PROFILE

After teaching preschool for four years, I began searching for an opportunity to learn something new. I love being creative, problem solving and being challenged in my work. Learning software development was my perfect solution. There is so much opportunity for growth, continuous learning, and creativity through design. I am excited to begin my professional career as a software developer.

PROJECTS

Make My Developpe - Front End Capstone

'Make My Developpe' is a single-page web application . It is a resource that dancers, training in ballet , can utilize to create training workouts and track their progress. This app was built using :
- React.js for framework
- HTML5 and CSS3 for styling
- Cloudinary for Image Management

KelleyCrittenden/Make-My-Developpe

Tails of Joy - Full Stack Capstone

'Tails of Joy' is a single-page web application . It allows users to view available dogs up for adoption and apply to adopt them. A user can then share their adoption story with others.
- Utilized ASP.NET, C#, React, JSX, CSS3 HTML5
- Designed Using Reacstrap
- Cloudinary for Image Management

KelleyCrittenden/Tails-of-Joy.
